DATE OF BIRTH: September 17, 1992

Current Position

Oesterreichische Nationalbank, Vienna

Jul. 2024 – Present

CITIZENSHIP: Austria

Economist in the Monetary Policy Section

EDUCATION

Stockholm University, Institute for International Economic Studies (IIES)

Sep. 2018 – Jun. 2024

Ph.D. in Economics

Stockholm University

Sep. 2015 – Jun. 2017

MSc. in Economics

Johannes Kepler University, Linz/Austria

Oct. 2012 – Jul. 2015

BSc. in Business and Economics

RESEARCH INTERESTS

Macroeconomics, Inflation, Nonhomothetic Preferences, Monetary Economics, Labor economics, Entrepreneurship

TEACHING EXPERIENCE

Monetary Economics, Ph.D. level

Spring 2022

Stockholm University, teaching assistant for Daria Finocchiaro, Andreas Westermark (both Riksbank).

Econometrics II, Ph.D. level

Spring 2020 and Spring 2021

 $Stockholm\ University,\ teaching\ assistant\ for\ Konrad\ Burchardi,\ Arash\ Nekoei\ and\ David\ Sch\"{o}nholzer.$

Macroecnomics I, Ph.D. level

Spring 2020

Stockholm University, teaching assistant for Alexandre Kohlhas.

Labour Economics and Wage Setting Theory, Masters level

Spring 2017

Stockholm University, teaching assistant for Lars Calmfors.

RESEARCH EXPERIENCE AND OTHER EMPLOYMENT

Institute for International Economic Studies, Stockholm

Jul. 2018 - Aug. 2020

Research assistant to Timo Boppart, Per Krusell and Kurt Mitman.

European Central Bank, Directorate General Research, Frankfurt

Aug. 2017 – Jun. 2018

Research assistant (traineeship) supporting the senior management Oreste Tristani, Philipp Hartmann and Luc Laeven.

ifo Economic Research Institute, Munich

Summer 2016

Summer intern supporting Bastian Schulz.

Johannes Kepler University, Linz/Austria

Jan. – May 2015

Research assistant to René Böheim and Thomas Leoni.

Professional Activities

Referee for Empirica: Journal of European Economics

2023

Organizer of the "Macro Group", internal seminar series at the HES

Sep. 2020 - Jun. 2022

SKILLS

Programming: Python, R, Matlab, Stata. Languages: German, English, Swedish.

Presentations

Uppsala University, University of Exeter, Sveriges Riksbank, Oesterreichische Nationalbank, EALE Conference in Bergen, Vienna Macroeconomic Workshop (Vienna Macro Café), Macro Breakfast at the University of Vienna, Econometric Society Winter Meeting (scheduled), 6th Winter Meeting of the NOeG (Austrian Economic Association, scheduled)

2024

2nd PhD Workshop in Money and Finance (Sveriges Riksbank), PSE-CEPR Policy Forum, 5th Winter Meeting of the NOeG (Austrian Economic Association) 2023

Swedish Conference in Economics, Annual Meeting of the NOeG (Austrian Economic Association), 14th Nordic Summer Symposium in Macroeconomics 2022

Stockholm-Uppsala Doctoral Student Workshop in Economics

2021, 2023

Research papers

Declining Hours Worked Among Entrepreneurs (Job Market Paper)

In this paper I show that, over the last 35 years, hours worked by entrepreneurs have fallen substantially: by five hours more than for workers. This decline accounts for the bulk of the fall in total hours worked and is present in all available sub-groups (gender, age, education, number of children, occupation or industry). It is robust to adjusting for compositional effects and occurred without noticeable changes in the relative hourly income of entrepreneurs. The decline originates from the top of the hours distribution: the share of entrepreneurs working many hours has dropped significantly. I interpret these facts using a Roy model of occupational choice, augmented with an intensive labor supply margin. The model allows the marginal return of working an additional hour to depend on the level of hours. I estimate the model at two points in time and find that a fall in the relative marginal return at higher hours worked is key for explaining the drop in hours and the drop in the share of entrepreneurs. I show that changes in the market structure of the goods or services that entrepreneurs sell can account for this.

A Nonhomothetic Price Index and Inflation Heterogeneity (with Markus Pettersson and Christoffer Weissert) We derive a nonhomothetic generalization of all superlative price indices and document cost-of-living inequality in the United States. When necessities and luxuries are separable in the expenditure function, this generalization eliminates the need to estimate a complete demand model. Using CEX-CPI data from 1995 to 2020, we find no differences in average inflation rates across the expenditure distribution, but 2.5 times higher inflation volatility for the bottom decile than the top decile, stemming from a larger exposure to food, gasoline, and utilities. Our analysis challenges inequality measurements using group-specific homothetic price indices and suggests an income-effect bias in these estimations.

A Distributional PCE Price Index From Aggregate Data (with Markus Pettersson and Christoffer Weissert)

This paper proposes a method to measure individual and aggregate changes in the cost of living when consumer behavior is nonhomothetic and microdata on consumption expenditures are not available. Aggregate prices and expenditure shares together with a single cross-sectional distribution of expenditures are sufficient to create a distribution of nonhomothetic cost-ofliving indices with this approach. The cost-of-living indices derive from PIGL preferences, generalize the Törnqvist price index, and only contain two unknown parameters. Because PIGL preferences aggregate consistently, these parameters can be identified from aggregate data. Using US Personal Consumption Expenditure (PCE) data, the method is applied to obtain a nonhomothetic PCE price index covering 72 product groups. This index reveals a 0.5–1.2 percentage point gap in annual inflation rates between the poorest and richest ten percents throughout 2022, and a similar 0.2 percentage point gap on average since 1988, thus suggesting that poorer households are hit harder both in the ongoing inflation surge and in the long run.

RESEARCH PAPERS IN PROGRESS

Welfare Implications of an Energy Price Shock. Joint with Per Krusell and Kurt Mitman.
