

FINAL OeNB Euro Survey Master Questionnaire Fall 2020

This document contains all questions asked to respondents in the survey wave of fall 2020 of the OeNB Euro Survey in English.

The numbering of the questions corresponds to the original numbering in the questionnaires used in the relevant survey waves.

Since the questionnaire of the OeNB Euro Survey has been adjusted each year to each wave, the relative succession of the questions asked may differ for each year.

- Questions or parts of questions highlighted in **yellow** indicate that they were deleted, rephrased or have been newly added compared to the master questionnaire of the prior year. If you use questions from multiple waves, please note that a question might have been subject to changes in several survey waves.
- Questions highlighted in **green** have been copied from prior questionnaires.
- Questions, that are highlighted in **grey** are not available for outside users.

We provide the data of all survey waves to external researchers (except some questions marked in grey – see above). The penultimate wave is made available once the data quality check of the most recent wave is finalized (usually from May onward, i.e. wave 2021 is available from May 2023 onward). Information on how to access the data can be found on our website ([Data sharing - Oesterreichische Nationalbank \(OeNB\)](#)). On the website you can also find additional information, e.g., a grid of questions per wave and a description of ex post harmonized socio-demographic variables included in the dataset.

[FOR INTERVIEWER: USE SHOW CARD ABOVE. EXPLANATIONS FOR THE VARIOUS BANK ACCOUNTS, PAYMENT CARDS AND OTHER ASSETS:

- A **current account** is a common type of bank account. It is set up at a bank or post office in order to receive your wage, pension etc. and to transfer money to other accounts.
- A **savings deposit** is money deposited at a bank in order to earn interest. Savings deposits are investments and are not used for payment purposes. Savings deposits can be due on demand or with a certain term during which deposits cannot be withdrawn.
- A **wage card** is linked to a current account at a bank to which your employer transfers the salary or wages at regular intervals. You can use the wage card to withdraw cash from ATMs.
- A **debit card** is a payment card linked to a current account that allows you to make purchases without using cash. Whenever you pay with your debit card, the amount will be directly deducted from your account. You may also use your debit card to withdraw cash from ATMs.
- A **credit card** enables you to make purchases and to withdraw cash on credit up to a prearranged ceiling. The credit granted can be settled in full by the end of a specified period or can be settled in part (in the latter case you pay interest).
- A **savings plan with a building society** is a savings contract that usually features a fixed term and penalties if the money is withdrawn before the end of the term. At maturity, i.e. at the end of the savings phase, the saver may choose to take out a real estate loan on favorable terms or to have the saved amount paid out. Often, such savings plans are subsidized by the government. (*REMARK: this explanation is only applicable in the Czech Republic, Hungary & Croatia*)
- A **life insurance** is a contract with an insurance company. The life insurance company pays out an amount of money if circumstances occur that are set out in the policy.
- A **mutual fund** is a collective investment scheme, operated by an investment company, which enables you to invest in a diversified portfolio of shares, bonds and other securities. Shares are issued and redeemed on demand, based on the fund's net asset value at the end of each trading day.
- A **stock** is a fractional share in the ownership of the corporate company. The value of a stock is linked to the value of the company and can fluctuate.
- A **pension fund** is a savings instrument which pays retirement benefits in the future. It is managed by an independent trustee into which a company and voluntarily the employee make periodic contributions.
- A **bond** is a fractional share in a loan to a company or government (debt security). It usually earns a fixed interest over a fixed period of time.
- **Other assets:** gold, jewellery, gem stone, artworks, etc.

Employer is a person who operates his or her own economic enterprise, or engages independently in a profession or trade, and hires one or more employees. Some countries may wish to distinguish among employers according to the number of persons they employ.

Own account worker is a person who operates his or her own economic enterprise, or engages independently in a profession or trade, and hires no employees.

Contributing family workers are those workers who hold a "self-employment" job (cf. paragraph 7) in a market-oriented establishment operated by a related person living in the same household, who cannot be regarded as a partner, because their degree of commitment to the operation of the establishment, in terms of working time or other factors to be determined by national circumstances, is not at a level comparable to that of the head of the establishment. (Where it is customary for young persons, in particular, to work without pay in an economic enterprise operated by a related person who does not live in the same household, the requirement of "living in the same household" may be eliminated.)
